

SAQUIB ALAM

Software Developer

I have thrived as a Frontend developer, contributing my skills and expertise to the development of dynamic and engaging web applications. My journey began with a solid foundation in ReactJs which enabled me to swiftly grasp complex concepts and build responsive user interfaces. I honed my proficiency in component-based architecture, class based component, state management and Hooks, allowing me to develop responsive, scalable and optimized user interfaces.

WORK EXPERIENCE

Software Developer

Tata Consultancy Services

07/2021 - Present

Around 3 years of experience

Achievements

- Working As a Frontend Developer for Apple Tv and Johnson & Johnson.
- Developed 10+ UI screens using React, JavaScript, HTML, CSS.
- Collaborated closely with designers and back-end developers to develop responsive web solution.
- Strong experience in developing Dynamic, Responsive, Scalable and optimized web pages using ReactJS, Redux, React hooks.
- Proficiently implemented React Dom routing for improved user experience and site navigation.
- Enhanced app performance through the strategic use of custom hooks, lazy loading, and optimization techniques.
- Have experience in working with Agile model, APIs using Postman, Robot Testing For Frontend UI Changes.

PROJECT

Food Ordering App (Food Villa)

- Leveraged Swiggy's Live API to fortify the data layer, ensuring seamless data retrieval and processing.
- Spearheaded the implementation of Shimmer UI to optimize user experience and enhance interface responsiveness.
- Enhanced search functionality by incorporating debouncing with a 200ms delay, significantly reducing unnecessary API requests during rapid key presses.
- Developed the application using cutting-edge technologies, including React, Tailwind, React Router, and Redux, to deliver a highly efficient and scalable product.

NetflixGPT (https://netflixgpt-1aa0d.web.app)

- Implemented Sign-in and Sign-up form handling with robust validation.
- Utilized Firebase web authentication for secure user access.
- Developed a modular API architecture for streamlined data management.
- Created an interactive interface to showcase movie cards using the TMDB API.
- Managed user and movie details efficiently, storing them in Redux for quick retrieval.
- Integrated GPT -3.5 API to offer movie suggestions.
- Ensured cross-device responsiveness for a seamless user experience.

TECHNICAL SKILLS

ReactJs React Hooks REDUX JavaScript

ES6 CSS Context API Sass TailwindCSS

Responsive design HTML Unit Testing Jest

UI Robot Testing Bootstrap Webpack

Material UI Java Typescript Git

Data structure and Algorithm Problem solving

Rest API Json

EDUCATION

B-Tech (2017 - 2021)

Information technology

ACHIEVEMENTS

Successfully completed the "Namaste ReactJs and Javascript Course" by renowned instructor Akshay Saini.
